The founder, Ra Uru Hu, received this knowledge in 1987 and for the next 25 years, dedicated himself to developing this profound and comprehensive system.

“

Due to my profession I had to work with different human potential questionnaires such as Meyers Briggs, Hermann Brain Dominance System, Enneagramm to name just a few. Out of my experience and my background as sociologist, I had no real expectations. To my surprise I got answers to questions in my life I had never dared to ask. I can highly recommend to give it a try and be open minded to the results. For me it was life changing in my personal approach of life.
